## Cut 2

# Gift Bag Cut Sizing

by learncreatesew.com

Create your own size -

**Desired interior size when flat:**

\_\_\_\_\_ (L) x \_\_\_\_\_ (W)

**Cut size:**

Length = \_\_\_\_\_ (L) + 4.25

Width = \_\_\_\_\_ (W) + 1

\_\_\_\_\_ X \_\_\_\_\_

\* Box corners as desired

\* Cut TWO pieces of ribbon whose length is 3 times the final cut width of the bag

Sizes demonstrated in the tutorial -

**Small** 5 x 5 inside when flat: Cut two 6 x 9 1/4 rectangles  
(Boxed corner guide size - 1x1, Two pieces of 18 inch ribbon)

**Medium** 8 x 8 inside when flat: Cut two 9 x 12 1/4 rectangles  
(Boxed corner guide size - 1.5 x 1.5, Two pieces of 27 inch ribbon)

## A bit about boxing corners -

What happens when boxing corners?

When determining the size of the final bag as you box corners, disregard the seam allowance and consider the portion of the boxed corner guide square that overlaps what will be the inside of the bag.

How much the square overlaps the interior section of the bag will change the height and width of the bag and determine how deep it is.

The top of the bag will remain quite flat, but you will notice the size adjustments at the sides and base.

A diagram of the small size bag is shown to illustrate what happens.
